

## **FURTHER EXTERNAL EXCHANGE LISTING FOR DASCOIN Currency of Trust Gains Major Foothold in Asian Market**

**London: September 26th, 2018:** DasCoin, the Currency of Trust and the store of value within the Das ecosystem, has announced today that it has begun trading on leading Singapore-based exchange CoinBene. Despite operating for less than a year, CoinBene has consistently ranked among the top 10 Exchanges as defined by CoinMarketCap.

This is a significant and positive development for DasCoin (DASC). By being listed on an exchange headquartered in Singapore, it can thus serve the Asian market in local languages and currencies.

Commenting on this milestone, DasCoin CEO Michael Mathias said: "We're really excited about this news as this now takes us to five public exchange listings. There's great volume coming out of CoinBene and this exchange offers users the possibility to trade in renminbi."

CoinBene follows CoinFalcon, BTC-Alpha, EUBX and, most recently, IDAX to be the fifth exchange actively trading DASC.

An independent review of CoinBene on the blockonomi.com forum stated: "The platform is relatively straightforward to use, offers a range of trading pairs, and has a familiar exchange interface like those of other trading platforms, so there is not a learning curve for new users. CoinBene is open to users around the world and offers several different languages, making it possible for most people to use the website in a language that they are fluent in, if not a native speaker. The default language is Chinese, but you can also change the website to English, Portuguese, Vietnamese, Malay, Spanish, or Korean."

**About DasCoin:** DasCoin is a better way to store and exchange value and is the next step in the evolution of money.

DasCoin is the blockchain-based currency at the center of an innovative digital asset system that seeks to optimize the strengths and eliminate the weaknesses of existing currency systems. It is fast, efficient, balanced, secure and scalable.

DasCoin is focused on creating a digital currency that delivers superior performance through greater operational efficiency, increased transaction capacity, wider distribution, better governance and greater regulatory compliance. Protected by industry leading
